

HOW TO REPAIR A POTHOLE

◆ Identify a pothole to be repaired.

◆ Put up signs and barricades to protect yourself and road users.

◆ Shape and clean the pothole.

◆ Remove all loose gravel and compact the base.

◆ Sprinkle water to create dampness.

◆ Apply Stable 60 (Slow set Bitumen Emulsion) and wait for it to change colour.

◆ Apply and shape the asphalt into a square / rectangle / triangle.

◆ Compact with a rammer or compactor.

◆ Apply Quarry Dust.

◆ Remove signs.
